SEAT COVERS

Eco Friendly Seat Covers Collection

The whole world is moving towards being ecofriendly and so are we.

Be the change you want to see....

Hemp Fabrics are the thing of future and we at Savy are using these to make our seat covers

Wooden Beads is another ecofriendly Material used for seat covers..

Earthline Collection

Earthline collection is the new range of ecofriendly seat covers made of Hemp Fabrics and natural wooden beads, which provide proper ventilation and massage.

SN:EC-20011

Wooden bead collection can be customized as per natural color choices

Cloth Seat Covers Collection

Fabric material segment will account for around 80% automotive seat covers market share by 2026 owing to their wide variety of options such as polyester, tweed, saddle blanket, nylon, jacquard, tricot, acrylic fur, etc. Fabric covers are less sensitive to temperature as they are resistant to scratches, wear & tear, water spills, and stains.

We believe high durability, less maintenance, and soft comfortable nature of the material as seat cover will positively influence the product penetration.

Easily removable covers.
Hosiery/Cotton/ Material
Cotton Towel Fabric Seat Cover Gives Luxurious Look

FOOT MATS

Foot Mat Collection

A car mat is made to protect your vehicle from road dust and other debris. If you were to buy a new car then you may want to consider investing in a quality car mat so that your vehicle remains as clean and as well protected as possible when it is being driven.

You may want mats for your car, because they will make your car more comfortable to drive in cold weather or hot weather.

Leather mats SN:LE-30021

Faux Leather mats SN:FL-30046

Foot Mat Collection

- Curly Style Floor Mats & Foot Mats
- Provides maximum safety while driving
- Completely Washable Easy to fit
